Professional Summary

Final-year Computer Science and Data Science Engineering student with a strong interest in programming, data science, and emerging technologies. Skilled in developing academic projects using programming and analytical concepts, with a willingness to learn new technologies and solve real-world problems. Passionate about building practical projects, improving technical skills, and working effectively in a team.

Education

Bachelor of Engineering in Data Science 2025 – 2029
Ballari Institute of Technology and Management
CGPA: 8.43/10

Pre-University Course (PUC) 2022 – 2025
Seshadripuram Mains Independent Pu College
CGPA: 8.2/10

Projects

Online Food Ordering System C-2025

- Developed a console-based food ordering system using C programming.
- Implemented a menu-driven interface for selecting food items and placing orders.
- Used arrays, functions, loops, and switch-case statements to manage menu items, quantities, and billing.
- Generated the final order summary and calculated the total bill based on selected items.

Sales Dashboard Analysis Python-2026

- Developed a Python-based sales analysis system to analyze revenue, costs, and profit.
- Used Python programming concepts to calculate total sales, revenue, and profit.
- Implemented a menu-driven interface to display sales and profit information.
- Analyzed sales trends to provide a simple overview of business performance.

Electric Bill Generator C-2026

- Developed a C-based electric bill generator to calculate electricity charges based on units consumed.
- Implemented user input, conditional statements, and calculations to generate the electricity bill.
- Calculated the bill amount according to the applicable unit-based charges.
- Displayed consumer details, units consumed, and the final bill amount clearly.

Skills

Programming Languages: C, Java, C++, Python, HTML

Databases: MySQL

Soft Skills: Communication, Teamwork, Time Management, Problem Solving

Tools & Platforms: VS Code, Git, GitHub, Eclipse

Awards & Achievements

- Maintained a strong academic record with a CGPA of 8.43/10 in B.E. Data Science.
- Successfully developed multiple academic projects using C and Python.
- Gained hands-on experience in programming, data analysis, and software development through academic projects.

Internship

- Completed practical training in C programming and programming fundamentals.
- Learned and applied concepts such as variables, data types, operators, loops, and functions.
- Gained hands-on experience with arrays, strings, structures, and pointers.
- Practiced problem-solving using conditional statements, loops, and functions.
- Developed a strong foundation in C programming through practical exercises and coding activities.
